Portfolio

Professional Summary

Entry-level Java Full Stack Developer with a foundation in Core Java, Object-Oriented Programming, SQL, database connectivity, and frontend development. Currently pursuing Java Full Stack Development training at QSpiders. Experienced in academic and personal projects involving Java application development and an AI-assisted 3D printing platform. Seeking a Java Developer internship or entry-level role to contribute to software development projects and strengthen practical skills.

Technical Skills

Programming	Java, SQL, JavaScript
Java Fundamentals	OOP, Collections Framework, Exception Handling, Generics, Multithreading, Java 8, Lambda Expressions, Stream API
Backend	JDBC, Servlets, JSP, Spring Boot, Hibernate/JPA, REST APIs
Frontend	HTML5, CSS3, JavaScript
Database	MySQL, PostgreSQL
Tools	Git, GitHub, IntelliJ IDEA, VS Code

Projects

AI-Enhanced 3D Printing Platform *Java, Spring Boot, MySQL, Python, YOLOv8*

- **Problem:** Manual 3D model preparation and print monitoring can make it difficult to identify printing defects efficiently.
- **Solution:** Developed an AI-assisted platform concept combining 3D model generation, print job management, and defect detection.
- **Java Implementation:** Focused on backend design for application data and print job management using Java and Spring Boot, with MySQL for data storage.
- **AI Integration:** Used a separate Python-based YOLOv8 component to detect potential printing defects from camera footage.
- **Outcome:** Designed a unified workflow for model preparation, print job tracking, and AI-based defect monitoring; explored OctoPrint integration for printer monitoring and control.

Employee Management System *Core Java, OOP, JDBC, MySQL*

- **Problem:** Managing employee records manually makes creating, searching, updating, and deleting information less efficient.
- **Solution:** Built a Java application to manage employee records through Create, Read, Update, and Delete (CRUD) operations.
- **Java Skills Applied:** Used classes and objects, encapsulation, modular methods, and exception handling to organize application logic and validate user input.
- **Database Integration:** Connected Java to MySQL using JDBC and SQL queries to perform employee record operations.
- **Outcome:** Implemented a structured employee record management workflow with database-backed CRUD functionality.

Education

B.Tech in Electronics and Communication Engineering *2022–2026*

Bishop Jerome Institute of Technology, Kollam **67.44%**

Internship Experience

Web Designing Intern **CodeDesign Technologies, InfoPark - 2025**

- Gained practical exposure to web design, website development fundamentals, and frontend technologies.

Python & Data Science Intern **Srishti Innovative, Technopark - 2024**

- Practised Python programming and explored introductory data science concepts during a short-term internship.

Certifications and Leadership

- **Programming in Java** – NPTEL, 2024
- **Web Development Workshop** – ICFOSS, 2024
- **FOSS Club Coordinator** – Helped organize technical workshops.
- **Student Coordinator, IIC** – Coordinated innovation activities and technical events.
- **Career Ambassador, ECE** – Supported peers with career awareness and technical skill development.
